Missing Sunix Vision Icon (Shortcut)

In some instances after rebooting or making some changes on the computer, Sunix Vision Icon disappears on the main desktop screen.

Steps

1. Open File Explorer .
2. Find which folder the v2k folder is. (For some, it is on the server computer, in this case it is on Drive C:)

3. Click on v2k folder, and search for v2000.exe.
4. Right click on the file and click Send to then Desktop (create shortcut)
